To Flower Lovers,

Everywhere.

Dear Friends:

This catalog, our silent salesman, offers at manufacturers' and growers' prices, the stock of one of the largest plant producing establishments in the United States--offers something for every garden and everything for some gardens, making it a book that should be consulted by every buyer of Roses, Shrubs, Bulbs and Seeds.

Years of experience in packing plants has resulted in methods which insure their safe arrival, and in the years of our business career our products have found their way into every state and territory, and into many foreign countries. For 40 years we have pleased the flower lovers of America, and the business today in all its departments still remains the property of and is under the direct control of the founders and their sons..

With assurances that all orders and communications shall have our conscientious and careful attention, we solicit a share of your garden wants for the year of 1912.

Faithfully yours,

The McGregor Bros. Company.

IMPORTANT INFORMATION FOR CORRESPONDENTS AND CUSTOMERS

We respectfully call attention to the suggestions on these pages, which if followed will aid in the prompt and satisfactory filling of your order.

Comparative Value of Roses

Don't think any

bloom early in the season and give excellent satisfaction in plants, but are generally preferred and considered worth

Rose too small to do well. In most sections of our country Roses do perfectly well and the one-year plants will make strong bushes in a summer, flowering continually throughout the season. The roots of the one-year plants being carefully protected in pots, permits of the shipping and successful planting of them anywhere. Roses of this size are to be recommended for all Rose-growing sections. If you wish the largest and best Roses for better effect and more bloom, then Roses of the two-year size from pots are to be recommended. These are, of course, much larger and heavier than one-year size and must, of course, be considered better for planting in beds and borders and in filling out landscape effects. Roses of this size every way. They, of course, cost more than the one-year difference in price.

Advantage of Pot-Grown Roses

There is another advantage in planting pot-grown Roses; namely, that they can be planted at any time of the year. This cannot be said of home grown field Roses or imported or grafted Roses. Such plants must be planted before they start into growth and the planting time is exceedingly short, and with these the best results can only be obtained when handled by an experienced Rosarian. With pot-grown Roses it is different. The ball of earth contains all of the fine fibrous roots, and when the plants are shipped transplanting can be done with no more injury to the plant than if the Rose had simply been removed to a larger sized pot. The growth continues just the same and the roots do not have to establish themselves, as is the case with the dormant plants. This kind of a Rose, being in a growing condition can be planted at any time through the growing season, and in this has many advantages.

Have your Roses on hand after all danger of frost has passed, and prepare the planting ground, which should be in a sunny location and apart from trees, overhanging buildings, shady locations, etc., by digging and working it as thoroughly as possible, same as for other plants. If possible, choose a cloudy day for planting, and do not allow roots to become dry. Make a hole large enough to admit the plant with the roots spread out in their natural position; then cover carefully, and press the soil firmly down and brings the roots in contact with the soil; then pour in water enough to wet the roots thoroughly, add more earth to fill the hole, and tread firmly down with the foot.

Roses on Their Own Roots

For the average amateur

Not Grafted

Rose planter, we cannot too strongly recommend the desirability of own-root plants. It is generally con-

ceded now by all Rose growers that they are far preferable to budded Roses and much more satisfactory in every way. The Garden Roses of today are mostly the compounds of many types and species, and it is a fact that upon some varieties the foliage is so similar to that of the wild root growth that it is not readily detected by those who are not professional Rose growers. In consequence, everything gives way to suckers and sprouts of wild Roses. Own-root pot-grown Roses never produce wild Rose it is impossible for them to produce anything but the genuine variety. The most prominent Rose growers of today are growing Roses on their own roots, fully recognizing their superiority for the garden and lawn. Very often it happens that the shoot of the variety budded onto the wild root will be broken off in packing or after planting or for some reason dies down; the plant is then entirely worthless. With an "own root" Rose you may break it or cut it back clear down to the roots without harm, as in sprouting from the roots the genuine variety only will be produced. In cold sections tender sorts often winter-kill from the top down to the roots, a budded plant in such case is thereafter worthless, but not so with an own-root one. Many of the budded plants are so ungainly, crooked and scraggly that shapely plants cannot be made out of them, and in consequence they are totally unfit for the lawn and garden. Nearly all budded Roses are grown on the wild Manetti Rose stock. It is natural for this stock to go dormant or partially so during the winter, and therefore when an ever-blooming variety is budded on this stock it is bound to impair the blooming quality of the plant for quite a portion of the year. It follows, therefore, that only professional gardeners, who thoroughly understand the science of budding and the growing of budded Roses should ever undertake the planting of budded Roses.

To remove the soil, or ball of earth, from the roots of the plants. This places the shipping of the plants on a mail order basis and inasmuch as we pay postage to all points of the United States and its possessions, we are willing to prepay the express charges on orders amounting to \$3.00 or more when shipped in this way, except, however, on orders for such plants as Cycas, Palms, Ficus, Azaleas, Araucarias, Camellias Rhododendrons, Banana Plants, large Lemons or other large decorative plants; Dahlias, Caladias, Peonies, large Shrubs, Nursery Stock, or vegetable seeds in pints and quarts, and garden requisites. Such plants as these must be shipped without the root being disturbed if one must expect the best results from them. The prepay offer does apply, however, on such plants as Roses, Begonias, Chrysanthemums, Carnations, Cannas, and ornamental Ferns, Geraniums, Fuchias, Lilies, mailing size Shrubs, hardy vines, some of the hardy perennials and miscellaneous bedding plants. These plants can be shipped to the most far-away sections of our country with the soil removed and transplanted safely. Our Fall Catalogue

of imported bulbs, plants and seeds for fall planting and winter bloom will be ready about September 1, and will be sent to all our patrons this year without request; to others free on application. If not received promptly, a postal card will bring it.

Errors and Complaints

We exercise the utmost care in filling orders, striving to do a little more than we offer, yet in the press of business errors sometimes occur, and when orders are received that are in some way damaged or not satisfactory, we wish to be promptly notified of the fact, and will make such an adjustment of your claim as will be satisfactory. When you write us simply give the nature of your complaint, giving a list of the plants damaged and price paid for them, and state wether you wish these items replaced or the amount refunded. It is nearly impossible to find time in the busy season to adjust your complaint promptly unless you give us all the information required to do so in your first letter.

Foreign Orders

10 per cent. extra should be added to all Foreign Orders for Roses, Plants, Bulbs, Seeds, etc., that go outside of the U. S. A. or its possessions. This additional amount is needed to cover the cost of extra postage and packing on long distance shipments. Payments are preferred by Money Orders.

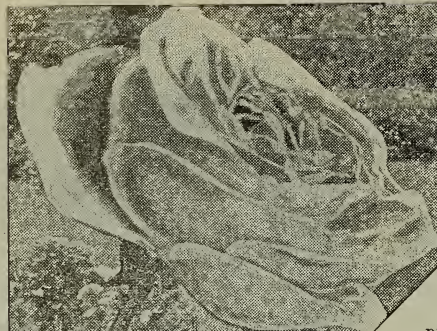

Many countries receive goods through Parcel Post from U. S. A. and most post-offices throughout Mexico receive packages by mail up to and including 11 lbs. each in weight. This gives customers in Mexico a decided advantage in the receiving of plants by mail, where orders are for plants that will permit of their being sent in this way.

The Porch Rose Dr. W. Van Fleet

Dr. W. Van Fleet, which is shown in natural colors on our front cover, stands at the head of the climbing roses. Nothing at all like it has ever before been produced. Its parents are the lovely sea-shell pink rose, Souvenir de Pres, Carnot, and the fast-growing, climbing or trailing, pure white memorial rose, Rosa Wichuraiana. The combination has brought about a rose with all the good qualities of both. The flowers, when open, run four inches and over in diameter—much larger than any other climbing rose and quite as large as most of the garden roses—and are borne constantly from the time the sun shines in the spring until late in the autumn. The center is built high and the petals are beautifully cupped and un-

It affords us much pleasure to recommend to our friends your stock and your method of doing business. F. M. SPANX, Texas.

The Wonderful Hardy
Monthly Blooming Climbing Rose

Dr. W. Van Fleet

If America needs a new Rose, it is a Porch Rose—a variety that will stand the many ills of plant life—a variety of showy foliage of vigorous growth and of more than ordinary blooming qualities. Growers striving to overcome the short lived character of the climbing class have introduced the hardy and disease proof Wichuraiana blood and the beginning in a new family of roses has been made in Dr. Van Fleet. We believe we are giving the rose world something different—something better—something nearer the ideal and an advance on anything in cultivation.

Dr. W. Van Fleet, which is shown in natural colors on our front cover, stands at the very head of the climbing roses. Nothing like it has ever before been produced. Its parents are the lovely sea-shell pink rose, Souvenir de Pres. Carnot, and the fast-growing, climbing or trailing, pure white memorial rose, Rosa Wichuraiana. The combination has brought about a rose with all the good qualities of both. The flowers, when open, run four inches and over in diameter—much larger than any other climbing rose and quite as large as most of the garden roses—and are borne constantly from the time the sun shines in the spring until late in the autumn. The center is built high and the petals are beautifully cupped and undulated. The color is a very delicate shade of flesh-pink on the outer surface, deepening to rosy flesh in the center. The flowers are full and double, delicately perfumed; the buds are beautifully pointed, and the stems are from twelve to eighteen inches long, which makes it a fine rose for cutting. The foliage is large and glossy, color a bronze green and has bright bronze red spines. The variety grows vigorously and is immune from mildew and other diseases which often befall roses. It would be hard to over-estimate its value. Price, strong 1-year plants on own roots, 20c each, postpaid; 3 for 50c, 6 for 90c, 12 for \$1.50, postpaid. Stronger 2-year plants, 50c each, 3 for \$1.25, 6 for \$2.00, 12 for \$3.75. (This size can be sent by mail, but express shipment is advised). Extra large 2-year plants, 75c each, 3 for \$2.00, 6 for \$3.50, 12 for \$6.00, by express only.

THE QUEEN OF ALL FLOWERS

THE GARDEN ROSE

The name is an inspiration to all garden lovers. Roses are justly classed among the showiest and best plants for decorating the home grounds. We endeavor in this catalogue to present the merits of each variety fairly and faithfully, being cautious not to overpraise—preferring to say too little rather than too much. Recognizing the importance of robust, healthy habit, hardiness and freedom of bloom, combined with beauty of flower, we propagate largely varieties possessing these characteristics and we recommend such kinds for general planting; and we also give due attention to those varieties which are less vigorous and robust, and which, therefore, require more care to bring them to perfection. In the hands of the Rose lover all kinds amply repay any care bestowed upon

them. Our immense stock and great variety of Roses enable us to offer assortments adapted to various purposes; and whenever we can be of any assistance in making selections, our services will be cheerfully given for the asking.

We Offer a Grand Collection of

Teas and Hardy Teas (monthly bloomers). Hybrid Perpetuals (Hardy Garden or June Roses). Hardy Climbing Roses. Polyantha Roses. Wichuraiana or Evergreen Roses. Moss and Rugosa Roses. Frequent among which is The National Rose of America

The American Beauty

THE GREATEST OF THEM ALL

A hardy Rose of the largest size, having the ever-blooming qualities of the Tea Rose with the delicious odor of the Damask or Moss Rose, and equally valuable for winter or summer flowering. The flowers are so eagerly sought that they sell in the larger cities during the holiday season at the extravagant price of from \$1.50 to \$2.00 for a single bud or flower. In color it is a deep, brilliant rosy-carmine, shaded towards the center with rich carmine-crimson. The back of the outer petals take the coloring of lighter dull carmine. The American Beauty is one of the most vigorous Roses we have. It makes the heaviest stems and the largest bush, it not being unusual to see a rampant bush with a dozen canes as thick as one's finger and several feet in height. The American Beauty is unquestionably the most popular Rose now before the public, a popularity due principally to its splendid values as a winter forcing variety. It should be protected outdoors in the winter. Sold under positive guarantee as being true to name.

Mrs. Noble, N. Y., says: "Plants arrived in perfect condition and were best value I have received from any Florist."

THE MOST DESIRABLE NEW ROSES OF 1912

Some of the Best Introductions of Various Prominent European and American Rose Specialists

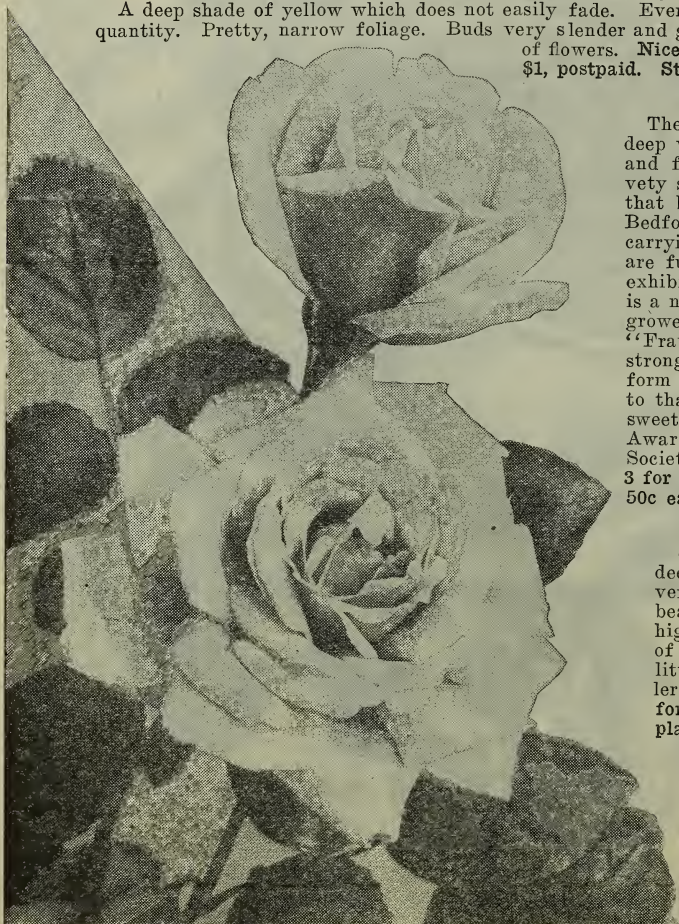

The best bloomers for the yard and garden are included in these newer Roses of all kinds. Those offered are of unusual value, most of them having been selected while growing and blooming in Europe the past season. Just as Rose growers in America have come to recognize the essentials that must be present in a novelty, so in Europe these same characteristics are being bred into the seedling, and it is with confidence that we recommend the following magnificent varieties. The number of new varieties of Roses introduced from all parts of the world will average about one hundred per year. After a thorough test, usually from five to ten sorts each year will come up to the mark as being worthy of cultivation. The Roses listed here are not untried, having passed the most severe tests, and are offered as gold medal varieties; and though, as with all Roses, some are of growth and habit such as to make them adapted to certain sections of the country, generally speaking all will be found highly desirable.

The Grand Outflower Rose Sunburst

It is a strong vigorous grower, carrying its flowers upright; the blooms are full, with high pointed center of the exhibition type. When seen at its best this is a noble flower, and by many expert rose growers it has been called the crimson "Frau Karl Druschki," because of its strong resemblance both in size, shape and form of flower, and freedom of growth, to that grand rose. It is also one of the sweetest perfumed Roses in cultivation. Awarded Gold Medal National Rose Society. Nice strong 1 year plants, 25c each, 3 for 60c, postpaid. Strong 2 year plants, 50c each, 3 for \$1.25.

It has a shining intense, deep pink color possessed by no other rose. It is a fine grower, free bloomer, good size and form, fragrant and in a class by itself as to color. Strong 2 year plants, 40c each, 3 for \$1.10.

The Beautiful Orleans Rose

An Improved Baby Rambler—The showiest and prettiest of all the Baby Ramblers. This charming and dainty Rose is of beautiful rounded habit and is a huge bouquet of deep cerise or Geranium-pink with distinct showy center of pure white; florets not crowded but of beautiful arrangement, making as a whole a charming combination that cannot be beaten. The color is irresistible. The plant grows like a weed and the flowers are nearly "immortelle" in their lasting qualities. We believe that they will outlast almost any other rose in existence with their stiff paper-like texture. This pretty rose has taken Europe by storm and will make a sensation as soon as known in this country. Awarded gold medal.

Strong 2 year plants, 50c each, 3 for \$1.25.

Miss Alice de Rothschild

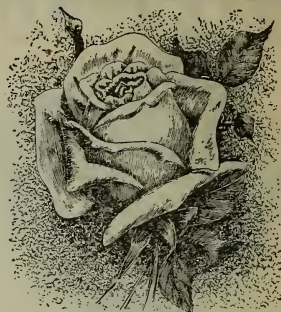

Not since the advent of Marechal Niel has any rose excited such admiration as this truly magnificent variety, by many called the bedding Marechal Niel. The color is rich deep citron-yellow which intensifies as the blooms expand; large, full and of perfect form with high pointed center; the petals charmingly reflex. Deliciously fragrant. (Marechal Niel perfume). Superb in every respect. Nice strong plants, 75c each, 3 for \$2.00, postpaid.

The Irish Rose Killarney

There is no Rose we know in this class that blooms more freely than Killarney, and the large size of the flowers and substance of petals are remarkable, petals often measuring two and one-half inches deep. (1) Crimson Maman Cochet

"As free-flowering as any Tea or Polyantha Rose."

This Rose has been named descriptively **Crimson Maman Cochet**, because of its vigor of growth, stiff stems, heavy foliage, freedom of bloom and its hardness fully entitle it to become a member of the Cochet family. It is as free flowering as any Tea or Polyantha Rose bearing its massive, large, full, cup-formed flowers singly, on long, stiff stems; the color is new, clear, red crimson velvet, brightening in the center; the flowers are the most splendid substance, and exquisitely fragrant. Price strong one-year plants, 20 cents each; three for 50 cents; \$1.50 per dozen, postpaid. Two-year-old plants, 35 cents each; \$3.00 per dozen.

(3) Pink Maman Cochet

"Buds beautiful; flowers superb; perfectly hardy."

Such beauty and exquisite form as is possessed by this variety is well nigh marvelous. The buds are beautiful, large, full and firm and elegantly pointed; as they expand they show great depth and richness sometimes measuring two and one-half inches from base to tip. Flowers superb when open, extra large, perfectly double and of splendid substance. Perfectly hardy in all sections of the country. The color is clear, rich pink, changing to silvery rose. Price, 15 cents each; four for 50 cents; \$1.00 per dozen, postpaid. Two-year plants, 30 cents each; four for \$1.00; \$2.50 per dozen.

Grows in almost any soil or situation and produces its superb flowers in amazing profusion on long strong shoots. For vigorous growth and freedom of bloom better than American Beauty, and without a peer. The flowers are full and perfectly double, the buds beautifully made long and pointed. Color warm rose-crimson. Hardy everywhere. Price strong one-year plants, 15 cents each; four for 50 cents; \$1.25 per dozen, postpaid. Two-year-old plants, 35 cents each; \$3.00 per dozen.

(5) White Maman Cochet

"Has the vigor of an oak, being hardy everywhere."

This most superb variety is identical with its parent Maman Cochet except in color, which is snowy white, sometimes faintly tinged with the slightest suggestion of pale blush. With the same freedom of bloom, magnificent form of buds and flowers, and hardness, it stands at the head of the list as the best White Rose for open-ground culture. It has the vigor of an oak being hardy everywhere. Price, 15 cents each; four for 50 cents; \$1.00 per dozen, postpaid. Two-year plants, 30 cents each; 4 for \$1.00; \$2.50 per doz.

(2) Yellow Maman Cochet

"Best hardy everblooming yellow rose in existence."

This variety is absolutely the best hardy ever-blooming yellow Rose in existence. In the open ground, it is superb—a typical Cochet Rose, with its gracefully molded buds, magnificent open flowers, stiff, strong stems, heavy foliage, and with the vigor of growth and blooming capacity that has made the Cochet Rose the best of their class and color. Price, strong one-year plants, 20 cents each; three for 50 cents; \$1.50 per dozen, postpaid. Two-year-old plants, 35 cents each; six for \$1.75; \$3.00 per dozen.

The 5 Grand Hermosa Roses

Old Ever-Blooming Hermosa

Hardy as a Lilac; free-flowering as a Geranium.

We believe the Hermosa is the best known in the entire rose family and a universal favorite. Hardy as a lilac bush and as free-flowering as a Geranium; it combines everything most desirable in a rose. The flower is cupped, finely formed and full, color most pleasing shade of pink, soft but deep, very fragrant. Price, 15 cents each; 3 for 40c; \$1.25 per doz., postpaid; large plants 30 cents each; 3 for 80c; \$2.75 per doz.

White Hermosa

"We counted on one plant 143 buds and flowers."

This is a lovely white Rose, a pure Tea, but a foreign seedling; the freest flowering white rose we have seen. It will be especially useful in set designs. For a pot plant it cannot be excelled as it possesses every good quality of a pot rose. We counted on one plant 143 buds and flowers in a single day and the plant was only nine months old. Try it. Price, 10 cents each; 3 for 25 cents; 90 cents per doz.; large plants, 25 cents each; 3 for 65 cents; \$2.50 per doz.

Yellow Hermosa

"No rose like it for freedom of bloom."

No rose like it for freedom of bloom. The plant is a fine grower and carries numbers of flowers on every shoot. A fine yellow rose, large, not at all formal, but very attractive. Called the Yellow Hermosa from its free-flowering character. We do not know of any rose that will give the satisfaction that this variety will and we heartily recommend it. Price, 15 cents each; 3 for 40c; \$1.25 per doz., postpaid; large plants, 30 cents each; 3 for 80 cents; \$2.75 per doz.

SPECIAL OFFER NO. 295—One each of the five Hermosa Roses, 1-year-plants, postpaid, for 60 cents; one each of the five Hermosa Roses, 2-year-plants, for \$1.25.

RED HERMOSA
1 yr. 15c., 2 yr. 30c.

Red Hermosa

"Unmatched in its velvety richness. Could be well termed 'The Velvet Rose.'"

The flowers of this variety are the richest red of any rose in our vast collection; a single bud or blossom will catch the eye at a great distance so brilliant is the color. Indeed, it is unmatched in its velvety richness; could well be termed "The Velvet Rose." It is as free in blooming as Bon Silene. One of our customers in California writes that she is kept busy by people asking her what rose this is. Price, 15 cents each, 3 for 40c; \$1.25 per doz., postpaid; large two-year-old plants, 30 cents, 3 for 80 cents, \$2.75 per doz., postpaid.

Crimson Hermosa

"The very best of all roses for bedding."

This is, without doubt, the very best of all red roses for bedding. It can be planted anywhere, being entirely hardy. The flowers are of large size and of a fiery scarlet, a color seldom seen in roses. Indeed, a bed of this rose produces a mass of red equal to a bed of Geraniums. It is planted everywhere on account of its color and freedom of bloom. None better. Try it. Price, 10 cents each, 3 for 25 cents, 90 cents per doz.; large two-year-old plants, 25 cents each, 3 for 65 cents, \$2.50 per doz.

HARDY HYBRID PERPETUAL ROSES (June Roses)

There is little question that June Roses are the most valuable of all hardy plants. They are of vigorous, upright growth, have large, bold flowers, frequently measuring 5 to 6 inches in diameter, and are deliciously fragrant. These Roses will succeed in any locality and are so hardy that they will live through the severest winters with but a light protection of leaves or coarse manure. All bloom freely at the usual time, early in the season, and some varieties, like Mad. Masson and Mad. Charles Wood, continue to bloom from time to time during the summer and autumn.

BEAUTIFUL PALMS AND DECORATIVE PLANTS

The bold, majestic, graceful foliage of Palms lends a grandeur and magnificence that cannot be obtained by any other class of plants, and there is nothing so satisfactory for home decoration. Anyone can succeed with the varieties offered on these pages.

Phoenix Roebelinii (The Ostrich Plume Palm)

This beautiful Palm has the grace and lightness of *Cocos Weddelliana*, but is more robust in growth, foliage gracefully curved, spreading in habit. It will be most popular for house decoration. Has graceful curving leaves with very narrow dark green pinnae giving it a lightness and airiness not surpassed. At the same time it is as hardy as the *Kentia* Palm, succeeding admirably as a house plant. Fine plants, 50 and 75 cents; larger plants, specimens, \$1.25 and \$2.00 (by express only).

Dracena Terminalis

A superb species, with rich, crimson foliage, so marked with carmine-pink and creamy-white that words cannot describe the exquisite coloring. It is a rapid grower, and for room adornment or as a vase plant for outdoors use it is indispensable. Price, fine plants, 25 cents each, larger plants, 40 cents and 75 cents.

Hints on Care of Palms

The failure to raise Palms successfully is usually due to two causes, first in the watering and second in the care of the foliage. It is not a difficult matter to know when to water and how much water to apply, as the Palm, like all other plants, should be watered well during the warm weather when it is growing and lightly during the winter when growing slowly, if at all. The one rule to follow is

that of giving the plant a good watering when it needs it and then allowing the soil in the pot to look a little dry before watering again.

The Palm is very subject to scale in its many forms, and a frequent washing, syringing or sponging of the leaves during the summer is necessary to keep the plant in a clean, healthy condition. The under side of the leaf is where the sponging should be done most frequently, as the insects do not bother the upper side of the leaves to amount to anything. When scale or mealy bug is first noticed on the foliage, and a sharp watch should always be kept for them, scrape each one off with a little smooth stick, the back of a knife or anything that will take them off and not injure the surface of the leaf. It will be found the only quick and really effective way of ridding of plants of them.

BEAUTIFUL PALMS AND DECORATIVE PLANTS

Date Palm

(Phoenix Canariensis)

One of the hardiest of the date palms with dark green feathery foliage of strong growth. It is especially valuable for outdoor decoration as it stands sun and wind without the least damage even in exposed situations. 15 and 25 cents each, postpaid.

This is one of the most exquisitely graceful among palms. Its wide-spreading, gracefully arching fern-like leaves are elegant and effective for apartment decoration. Nice plants, 20 cents each; a larger size, good plants for 35 cents.

Dracena Indivisa, 10c-25c.

Areca Lutescens.
35c, 50c, \$1.75

NOTICE—It may be well to state here that young palms do not resemble the illustrations given, as they do not show their character leaves until the second and third year, so that when you order small palms and see long, narrow leaves instead of the character leaves, as shown in the illustration, do not think that the wrong kind has been sent you.

Areca Lutescens

One of the most beautiful Palms. Its dark, glossy green leaves are gracefully curved on slender stems, and the entire foliage is gracefully disposed; the trunk and stems are golden-yellow. Price, nice plants, 35 cents, postpaid; larger plants, 50 cents and \$1.75 each (by express.)

Sago Palm

(CYCAS REVOLUTA)

Makes a magnificent specimen plant, for the lawn or house. Their heavy, glossy, deep green fronds resist alike the gas, dust and cold to which decorative plants are frequently exposed. Price, nice, small shapely plants, 75 cents; six to eight leaves, \$1.00 each; eight to ten leaves, \$1.50; ten to twelve leaves \$2.00. Bulbs increase in size each year and leaves double in size and number. Cycas can be sent by express only.

BEAUTIFUL DECORATIVE FERNS (THE BEST for HOME and PORCH DECORATIONS)

These beautiful plants for home decoration vie with the Rubber plants for first place in the esteem of flower lovers. They are finely cut and oddly shaped. Fronds have a graceful effect produced by few other plants and they do exceedingly well in the parlor and conservatory. The *Nephrolepis* family, of which the well-known Boston is a member has furnished us many beautiful species of late years. We recommend all the varieties listed.

New Plumed Fern

(*Elegantissima* or Tarrytown)

This is a sport from the *Pierston* Fern; the plant is of much more compact habit, one-half as tall, but with all the fronds nearly twice as wide making it a much more desirable plant for all purposes. Price, nice young plants, 15c each; larger plants, 25 and 50 cents each, postpaid.

The Plumed Scotti Fern

(*Nephrolepis Scholzeli*)

The ideal plumed Fern, holding the same position to all other plumed varieties that *Scotti* holds to the old *Boston*. It is a sport from *Scotti* possessing all of the merits of that most popular variety, but with the pinnae sub-divided, giving it an airy, feathery appearance. Price, nicely shaped plants, 15c each; larger size, 50 and 75 cents each, postpaid.

Nephrolepis Scholzeli, 15c, 50c

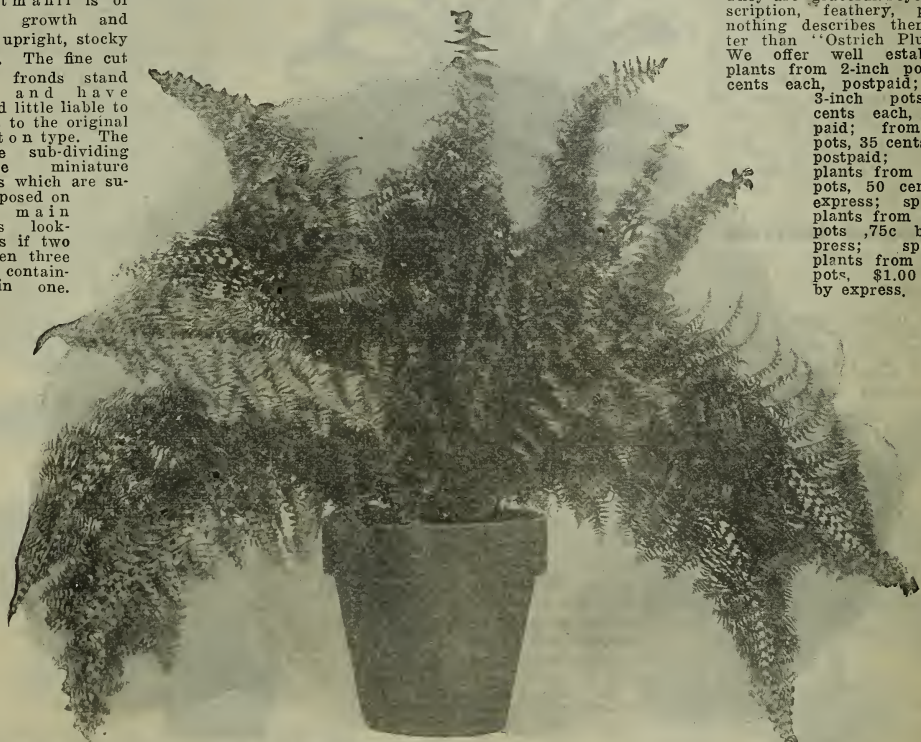

The Beautiful Ostrich Plume Fern (*Nephrolepis Whitmanii*)

The *Nephrolepis* family of Ferns of which the well-known *Boston* is a member, has furnished us so many beautiful species of late years and are succeeding so well that this family has become the most popular of all. The best variety is "The Ostrich Plume" Fern, *Nephrolepis Whitmanii*. The graceful pluminess and charm of the new *Nephrolepis*, its characteristic features of shape, size and growth, give it distinction and superior commercial value. The

Whitmanii is of dwarf growth and wide, upright, stocky shape. The fine cut fluffy fronds stand erect and have proved little liable to revert to the original *Boston* type. The pinnae sub-dividing make miniature fronds which are superimposed on the main fronds looking as if two or even three were contained in one.

They are graceful beyond description, feathery, plummy; nothing describes them better than "Ostrich Plumes." We offer well established plants from 2-inch pots, 15 cents each, postpaid; from

3-inch pots, 25 cents each, postpaid; from 3½ inch pots, 35 cents each, postpaid; strong plants from 4-inch pots, 50 cents by express; specimen plants from 5 inch pots, 75c by express; specimen plants from 6-inch pots, \$1.00 each, by express.

Our leaflet on growing Ferns will be sent free with your order if you ask for it.

The New Fern "Roosevelt"

Introduced as "The Greatest Fern of the Age."

In general characteristics it resembles the Boston Fern but with two points of great excellence over that variety. First, it produces many more fronds making it a bushier and handsomer plant; then the pinnae are undulated giving it a pronounced wavy effect seen in no other fern. It is highly recommended. Fine young plants 40c, stronger plants 60c, postpaid, strong specimen plants, 75c each, by express only.

The Fish Tail Fern

(*Nephrolepis Davallioides Furcans*.)

This is a grand Fern, entirely distinct from any of the other varieties of *Nephrolepis*. Throughout the South and especially at New Orleans this Fern takes precedence over all others. The ends of each pinnae are so formed as to resemble a fish tail, giving the fronds a crested appearance, very effective. It grows into the most shapely plant of any of the *Nephrolepis*. Grand for house culture. Fine strong plants, 50 cents.

The Boston Fern

(*Nephrolepis Exaltata Bostoniensis*.)

This popular Fern has proved one of the best decorative plants of recent introduction. The fronds are much larger than the Sword Fern, and do not stand so stiff, but droop gracefully. Excellent for making large specimen plants also for hanging baskets. Price, nice young plants, 10 cents each; larger plants, 25 and 50 cents each.

Fern "Roosevelt," 40c, 60c, 75c

Nephrolepis Piersoni

They are graceful, feathery, plummy, nothing describes them better than "Ostrich Plumes." Price, nice young plants, 15 cents each; larger plants, 25 and 50 cents each.

Many places more or less shut out from the sunlight may be converted into veritable beauty spots by clumps of Ferns of various kinds. Price, 25 cents each; 3 for 70 cents; 6 for \$1.35; \$2.50 per dozen, by express only.

Hardy Fern, 25c

The Newport Parlor Fern

(*Nephrolepis Scotti*.)

CHRYSANTHEMUMS

Best For Out Doors

The Chrysanthemum is of easy culture, but to secure fine blooms and strong plants, care and attention while the plants are growing must be given. There is probably no plant cultivated for its flowers, which is capable of greater possibilities, and year after year the blooms are becoming finer, better in color, size, form and in every way, showing that the time and study which is being given them is not in vain.

NEW FANCY JAPANESE CHRYSANTHEMUMS

Chrysanthemums are of Japanese and Chinese origin, and are by far the most gorgeous and elegant of our fall blooming plants. Through the enterprise of American growers, who have given them time and devotion, they have, as if by magic, so developed as to give them the unquestioned title of "Queen of Autumn Flowers." For massive blooms, grandeur of color, ease of culture and certainty of flower, either in the open ground or in pots, there are no plants that will surpass them, and but few their equal. The season of bloom lasts up until severe frosts. It is a pleasing thought to anyone who may have poor success with flowers to know, whether other plants bloom or not, the Chrysanthemum will put forth some sort of a flower if the plant is only a few inches high. The endeavor of nearly all growers has been, in late years, to introduce varieties which will produce the largest and finest blooms for exhibition purposes, and it is of these varieties that our list is made up. Every sort we offer, if well grown, should prove a prize winner.

Oenothera "America"

New Red Sunflowers

Gigantic Evening Primrose

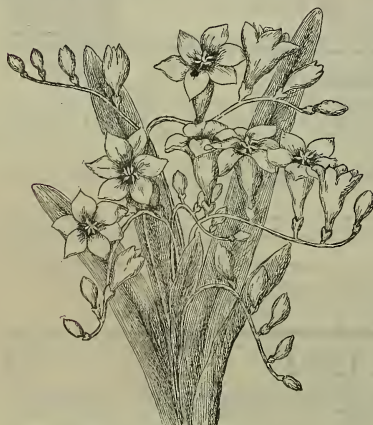

Oenothera "America"

The original seed from which Mr. Burbank developed this wonderful plant was discovered by one of his collectors in the Cordilleras of Chili. "As far as I know, with the exception of my own Shasta Daisy, no hardy plant bearing snow white flowers produces such a wealth of enormous blossoms and so continuously for months in succession. By most rigid selection for size, snowy whiteness, and abundance of bloom, a variety has now been built up which produces banks of flowers uniform in every respect from seed, four and a half to five inches in diameter, of purest white, turning to clear rose pink as it fades.

The Oenothera "America" can be grown with the utmost ease, producing flowers the first season from seed, and in most localities is a hardy perennial continuing throughout the whole summer and fall to bloom abundantly. Any ordinary heavy frost has no effect on the plant. Price, 15 cents per packet.

Freesia Hybrids "Ragioneri"

These are the most remarkable novelties of recent years. The originator was awarded a gold medal at Nice, France, last summer. The introducer declares them to be as easy to grow as the old popular white Freesia. The richness of color and variety of shades of these marvelous hybrid Freesias is wonderful. Type of New Asters "Daybreak and Purity"

We have used the greatest care in obtaining our Flower Seed, and those we offer you are absolutely fresh, being grown under our personal supervision or imported from the best foreign seed growers. Failure in getting satisfactory results from seed planted may be attributed to the manner in which the seed is sown rather than the lack of germinating power in seed, and seedsmen are unjustly censured when the fault lies in the cultivator and not in the seed.

Sowing of Seeds—Spade the soil in the seed bed to a good depth, work it over and over with the spade in order to mash the small clods. Sow the seed in drills or broadcast, according to the kinds, covering carefully and lightly, there being more danger in covering too much than not enough. Never allow the seed to remain in dry soil.

For seeds that require an early start, to secure blooms before frost, sow in shallow wooden boxes, in good garden soil. Cover seeds very lightly, keeping the box in a sunny window, covering the box with a pane of glass until the seeds begin to sprout, but never allow the soil to become too dry.

Transplanting of Seedlings—Do not allow the little plants started in the boxes to grow too tall before transplanting. Care should be taken in watering seedlings well after planting and to protect from the sun for a few days with light paper.

Flowers from seed are usually known as annuals, biennials and perennials.

Annuals bloom and ripen seed the first year, and then perish.

Biennials do not generally flower the first year, and are in perfection only one year.

Perennials continue to flower several years in succession. Many of them bloom the first year if sown early.

NURSERY DEPARTMENT Choice Fruits and Fruit Trees

Prices on Nursery Stock are placed low and we cannot allow premiums on orders for Fruits or Fruit Trees. The trees offered are young and thrifty and will make a very rapid growth and bear quickly. When fruit trees or shrubs are received, before they can be planted they may be safely kept a reasonable length of time by having the roots packed in boxes of moist soil and stored in a cool cellar or shed. It is important to order fruits early, that they may be planted out before the foliage starts.

When offered by mail, postage is paid by us; if by express or freight, charges are to be paid by purchaser; but larger stock will be sent.

SPECIAL NOTICE—As our Nursery is a separate and distinct department from our Greenhouses, it is necessary that all nursery stock be shipped direct from the Nursery.

STRAWBERRIES THE BEST FRUIT THAT GROWS

All varieties offered in this list have perfect or bi-sexual blossoms, except those marked (P), which are destitute of stamens and are termed pistillate or imperfect flowering varieties and must be planted near some perfect-flowering sort or they will produce little or no fruit. We advise fall planting for the best results. Dip the roots of the plants in water as soon as received, and bury the roots in moist, shady ground till you are ready to set them out. Do not wet the tops or you will rot the plants. Neglect for an hour or so is often fatal.

McGregor's Earliest Strawberry

Of all Strawberries in our list, this ripens the earliest, producing an abundant crop of perfectly round beautiful berries of very rich and delicious flavor.
